Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Previously on List 4.3. Taxonomic distinctiveness from *S. nana* is uncertain; needs further study. Some noted differences of *S. holmgreniorum* include: relatively elongate stems (*S. nana* is shorter and more compact), elongate inflorescences (*S. nana* has a very short, compact inflorescence), and may or may not have some hairs gland-tipped (*S. nana* never has gland-tipped hairs). On watch list in NV. A synonym of *S. nana* in *TJM* (1993) and *TJM* 2. See *Brittonia* 33(3):449-450 (1981) for original description.
