## Notes

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Historical occurrences need field surveys. Threatened by development, non-native plants, and grazing. Possibly threatened by dam maintenance, road construction and maintenance, and recreational activities. Similar plants from MNT and SLO counties may be *S. glandulosus* ssp. *glandulosus*; see this name in *TJM* 2; further study is underway to determine its relationship to the *S. glandulosus* complex. See *Bulletin of the Torrey Botanical Club* 13(1):142 (1886) for original description, and *Madroño* 14(7):217-227 (1958) for taxonomic treatment.
