Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Previously CRPR 3; plants were known as possible hybrids between *B. filifolia* and *B. orcuttii*, but are now recognized as distinct. Research into the evolutionary origin of *B. santarosae* is currently underway. Possibly threatened by development. Forms sterile hybrids with *B. terrestris* ssp. *kernensis*. Not in *TJM* (1993). See *Madroño* 54(2):187-198 (2007) for original description.
