Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Known from only two collections (last in 1932) in CA. Possibly extirpated by grazing. Recent field surveys (including 1994-1996) unsuccessful. Extant and rare on GU Isl. Previously treated as *Mimulus latifolius*; *M. latifolius* is currently a synonym of *D. brandegeei*. See *Proceedings of the Academy of Natural Sciences of Philadelphia* 99(7):170-171 (1947) for original description (as "brandegei"), and *Phytoneuron* 2012-54:1 (2012) for revised nomenclature.
