Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Previously on List 1B. Plants from MNT and SCR counties need verification. Threatened by coastal development and non-native plants. Can be difficult to identify; many herbarium specimens need to be checked for correct identification. May be a hybrid between *G. hirsutula* var. *hirsutula* and *G. stricta* var. *platyphylla* or *G. stricta* var. *angustifolia*; needs further study. Not in *TJM* 2. See *Pittonia* 2:289 (1892) for original description and *Novon* 2(3):215-217 (1992) for revised nomenclature.
