Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Move to List 1B? Location, rarity, and endangerment information needed. Expected to only occur in the Santa Ynez Mtns., but plants are also recorded from the San Rafael Mtns. Taxonomic distinctiveness from *R. amarum* is uncertain; needs further study. Possibly threatened by non-native plants. A synonym of *R. amarum* in *TJM* (1993) and *TJM* 2.
