Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Seriously threatened by residential development, agriculture, foot traffic, grazing, illegal dumping, non-native plants, and vehicles. Potentially threatened by road construction and fuel break maintenance. Hybridization with *B. orcuttii* and *B. terrestris* ssp. *kernensis* facilitated by European honeybees. See *Proceedings of the American Academy of Arts and Sciences* 17:381 (1882) for original description.
