Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Known only from the Santa Monica, Santa Ynez, and Sierra Madre Mtns. Many occurrences historical; need field surveys. Possibly threatened by trail maintenance. Previously included plants from Santa Ana and Palomar Mtns., which are now described as *hypoleuca* ssp. *intermedia*; a rare taxon. Intergrades with *M. villosa* ssp. *obispoensis* in areas of overlap. See *Synoptical Flora of North America* 2(1):356-357 (1878) for original description and *Novon* 19:315-343 (2009) for revised circumscription.
