### **Notes**

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

First collected in California by L. Hendrickson in 2003; identification confirmed by J. Rebman in 2014. Similar to *A. palmeri* in CA; distinguished in having roughly pubescent leaf blades (vs. softly tomentose) and styles that contain 8-10 branches (vs. 10-12). See *Annuaire du Conservatoire et Jardin Botaniques de Genève* 6:22 (1902) for original description.
