Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Known from only one occurrence with fewer than 15 trees in Wild Boar Gully; one of the rarest trees in CA. Mainland occurrence of one plant from LAX Co. (113C) needs confirmation; possibly introduced or hybrid with *C. betuloides* var. *betuloides*. Recovery work in progress. See *Proceedings of the California Academy of Sciences* III 1:136 (1898) for original description, and *Conservation Biology* 3(1):52-58 (1989) for discussion of hybridization.

Threats

Threatened by feral herbivores and hybridization.

Taxononmy

Threatened by feral herbivores and hybridization.
